7:00, Thursday, June 23
Emily Carr Lecture Theatre - Room 301

Brian McBay

Brian McBay is an emerging artist, designer, and arts administrator currently based in Vancouver, BC. McBay is a founding member and the Executive Director of 221A Artist Run Centre, a non-profit organization with a focus on encouraging a dialogue between contemporary art and critical design. McBay is a past recipient of the University of Waterloo Clarica Scholars award (2003) and has given talks and shown work in a variety of places including Centre A's Let's Twist Again Symposium (2010) and the Vancouver Art Gallery (2011).

Marianne Amodio

The underlining theme of the work at marianne amodio architecture studio has been the creation of innovative architecture that is concise and practical, yet poetic and personal to the client. As an emerging architect, much of Marianne's work is considered to be architectural installation, striking a balance between fanciful architecture and functional art. Marianne's past work includes installations at the Vancouver Circus School, Tiny Eats, The Great Wall Tea Company, Cocoon Branding and the Manitoba Hydro Museum. Marianne is a registered architect with the Architectural Association of British Columbia and a Leed Accredited Professional.

Christy Nyiri

Christy Nyiri is an art director who makes websites, drawings, designs and the sporadic wedding cake. Since graduating from Emily Carr with a Bachelor of Media Arts, she has actively collaborated within the artist collective Norma, produced art/video/karaoke/comedy works with the creative team Weekend Leisure, and co-founded the web design studio David Christy & Internet. Nyiri cites sweatpants, puns and slow-motion landscape pans as her main sources of inspiration.

Pilgrims to Nowhere

"It's a great white place, / And the heat's diseased"
–Kyuss, "100°", *Welcome to Sky Valley*

Although the blank illusion at the terminus of Stephen Walters' *Psyche Room (50,000,000 Trip)* mimics the cycloramas or "cyc rooms" used as special-effects backdrops in television and film production, it also plays vividly on a precursor of cinema itself. In the late nineteenth century, cycloramas of an earlier form, made from vast, interlocking chains of painted murals arranged in a circle, were the historical blockbusters of their day, surrounding their viewers in panoramas depicting decisive moments in communal history. (These were typically military or religious in nature. In Belgium, a cyclorama depicted the Battle of Waterloo, and in Gettysburg, the Battle of Gettysburg. The Cyclorama of Jerusalem at Ste. Anne de Beaupré, Quebec, portrayed the Crucifixion.)

In its note of elegy, its sense of memorial, *Psyche Room* is like one of these century-old hybrids of spectacle and monument—but one that has been broken open, its contents fragmented and tipped out into the rooms of the Access gallery. The photographs that draw the viewer through the winding space depict stark, remote locations in California's Coachella Valley where, fifteen years ago, a small but influential collection of young rock bands—Fatso Jetson, Across the River, and Kyuss, among others—became the focal point of the "Desert Scene," a series of improvised, hedonistic parties powered by portable generators. After the photographs comes a video image of one of these generators, its rumble competing with recordings of the thunderous, bottom-heavy songs of the bands themselves. And finally, looming at the rear, haunted by these sounds as they tangle into noise, is the engulfing, vacuum-like chamber. The illusion offered here is one of expanse without edge, space without dimension—of history, in the form choreographed and sanctified in the painted cycloramas of more than a century ago, wiped out. It resembles a disused set, a bare piece of the rigging that eventually developed into Hollywood's infinite field of fantasy. This, it seems to say, is what our current, media-soaked culture looks like with the CGI software disabled, with the projector switched off.

The effect wavers between two connotations of limitlessness. One of these, recommended overtly by Walters himself, is a sense of unqualified freedom. The bands who formed and drove the Desert Scene were, by their own accounts, attacking the strictures of life in the outlying towns of Palm Springs and Palm Desert and Indio—

Dust, C-print, 2005

...major
...and San Francisco
...the young musicians came
...centres but rather by moving as far
...ould, into a "wasteland" of flat, scrubby
...anyons, and huge star-filled skies. It was a retreat
...unpopulated vastness hinted at by Walters' trompe-l'oeil, and one can suggest, as Walters does, that the seemingly unbounded scope of desert and sky served to inspire the enormous, fluid, trance-inducing sound the groups created.

And yet the experience of standing in the white-out of the cyclorama itself remains profoundly unsettling. As you confront the enclosure after passing the series of conventionally composed photographs and the familiar shape of the video monitor, the second connotation of limitlessness—that of an abyss or void—chases the mind as it seeks rudimentary compass points, a *frame*, to stabilize perception. If Walters' white chamber, in its illusion of infinity, evokes the vastness of a landscape, it is a landscape starved of coordinates, an illegible realm.

Here, perhaps, is a rendering of what the young people who formed the Desert Scene first saw when they turned their backs on the action films and sitcoms and rock videos engineered to fill their days, and instead looked out to the surrounding, unmediated terrain. It is what many encounter in communities lying on the geographic fringes of mass culture—places where the tightly planned, protean and disposable universe of celebrity and entertainment rubs up against a sprawling and seemingly indifferent wilderness that comes with no supplied narrative, no prefabricated frame to compose and thus comprehend it. It is a learned inability to interpret and experience the local environment in a direct or meaningful way, suffered by those whose internal clocks have been calibrated by the 30-second spots and 24-hour daytime of consumerism, their eyes trained by the unending procession of attention-grabbing events, however transitory or hollow.

For the members of the Desert Scene, overcoming this required the establishment of their own, fully improvised sense of community, a self-negotiated culture centred on music, as haphazardly evolved but as finely adapted to local conditions as any desert creature. And if *Psyche Room* functions in any way like the nineteenth-century cycloramic spectacles, with their staged history lessons, it does so by outlining the unique strategy on which this local achievement was based. In a basic sense, the Desert Scene simply reversed a current that began to flow with force in the theatrical paintings of the nineteenth century and became a torrent in Hollywood and Disneyland: a current which, in a sense, brings the "outdoors" indoors by using devices like the cyclorama to create illusions of vast, receding exterior space. Instead, the musicians of the Coachella Valley, equipped with their generators, brought a culture that was normally reserved for the confines of bars and nightclubs to the genuinely vast space of the local desert. "Indoor" culture—increasingly virtual, increasingly corporate—was dragged outdoors, to an unguarded, unowned place where it could be recast as desired.

And yet the power of that blank room extends well beyond the details of a particular episode in pop-culture history. By setting up staging and then denying us spectacle, it instills a sense, however brief or faint, of disorienting withdrawal pains from the manufactured, cinematic culture on which we've come to rely for our sense of collective identity. It gives us an idea of just how far we've drifted into the reaches of redundant fantasy, and away from the landscape and the possibilities of community that are, paradoxically, closest at hand.

Brian Lynch
October 2005

Stephen Walters is a Canadian/American artist whose young adulthood was spent in the California desert. He graduated from Emily Carr Institute in 2002 with a Bachelor of Fine Arts. Walters currently lives in Vancouver.

Brian Lynch is a journalist and critic focused on the visual arts, popular music, and books of all kinds. He lives in Vancouver.

Wishing Well

Over the course of the next few summers, the hermit Russell Letawsky figured very largely in our family. Since that original meeting, he had become a close family friend to all of us. He was funny, charming, worldly and full of incredible

48 ADVENTURES IN SOLITUDE

shot high into the air, the booming sound of the powerful gun bouncing off the cliff walls and back again. The shot caused Loop to instantly start up with a deep, menacing growl, a bark that came from an obviously large dog. The pearl-hers wasted no time scrambling back into their boat and speeding off into the night. It was their last visit.

Russell let me trace his movements all over the Sound, whether by boat or on foot. Here we've pictured at one of Russell's meditation spots, a lookout high above Kakkaykay Bay. That's me in the foreground during my Indiana Jones phase, the glasses being rather unfortunate.

12
Captains Courageous

Unfortunately, Dad became increasingly busy going back and forth from the city to the Sound, dealing with prospective customers. The Canadian economy was in the dumps and it became stressful for him just to make ends meet. The sales of the individual lots had slowed to a crawl; banks were foreclosing on various neighbours' properties. Dad insisted that Mom, Heather and I still use the cabin as often as we could in the summer months, and we would nervously make the journey on our own without our tower of strength and knowledge. With Dad away, Heather spent most of her time near the cabin with Mom, and I spent more and more time with Russell. Unlike my father, Russell seemed much more imperfect. He smoked, swore and drank a lot, none of which Dad did. Dad started the morning with three hundred push-ups and three hundred sit-ups. Russell started the morning with a doobie, a West Coast

ABOUT THE EXHIBITION
Public Access: 1999 & Beyond
Since 2009, Weekend Leisure has been producing a public access television programme, The Weekend Leisure Network, which airs locally in Vancouver on Novus Network Channel 4. Each episode consists of segments that vary in style and content, from studio karaoke performances to improvised non-sequiturs, and are often the result of various collaborations with individuals in Vancouver's arts, comedy and karaoke communities. For Public Access: 1999 & Beyond at the Helen Pitt Gallery, Weekend Leisure has curated local artists and comedians to create work that will be shown in an art exhibition taking the form of a public access television programme.
SHITTY SPOCK
Employing an overarching theme of "science fiction", the five participants were asked to produce works that considered the do-it-yourself aesthetic and lack of resources of public access television, responding to its limitations as a medium of democratic creative expression. The resulting video pieces–whose concepts arise from interests in found footage, community theatre, fan fiction, local news broadcasting, primitive computer animation and space travel–bring together individuals from backgrounds both in and out of the contemporary art world, extending their creative potential beyond their respective fields.

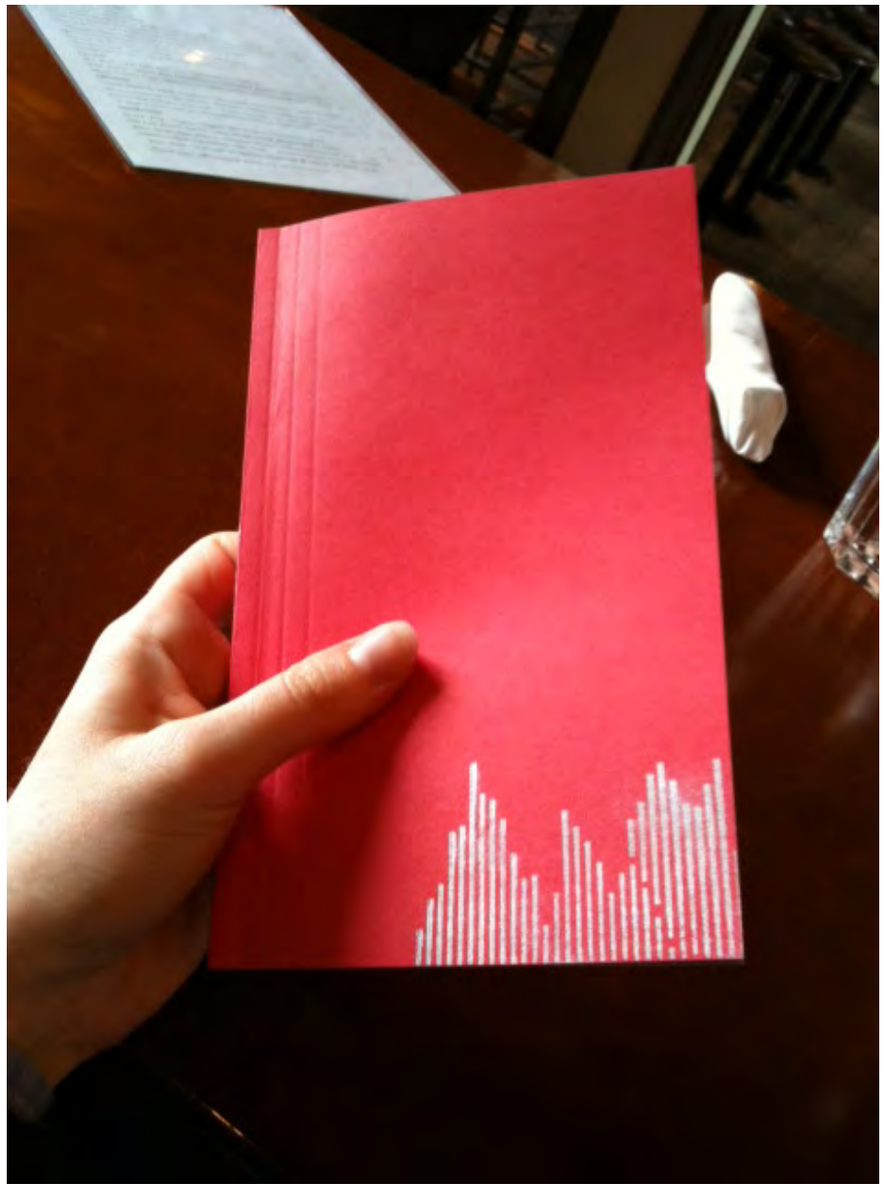
PUBLIC ACCESS 1999



technically correct when it comes to telling the story. The best part of making a purposefully shitty series of videos is that you are encouraged to worry about the right things.

What's your preference: the original series (TOS) or *The Next Generation* (TNG)? Any particular reason for one or the other? Do you have any affinity to the other canon television shows—*Deep Space 9*, *Voyager* or *Enterprise*?

KAITLIN: I am first and foremost a TNG fan. But I have a deep appreciation for the original series as well. I never got on the *Deep Space 9*/*Voyager*/*Enterprise* train, personally. Never a compelling enough reason. With TNG, the compelling reason can be spelled out in two words (one hyphenated): Jean-Luc Picard.

NICOLE: Original Series, all the way. There are some shows you watch in your youth that don't hold up once you grow older (Hercules is one). TOS might be dated and low-budget, but every episode is dripping with charm from their characters, who will never go out of style. Bones, Spock and Kirk especially. I also have a fondness for *Voyager* mostly because I'm a closet feminist and I was jacked on Captain Janeway's tough broad ways when I watched it in my younger days.

Do you have a favourite Star Trek film?

KAITLIN: I'm a tie on *First Contact* (the Borg Queen!) and *Nemesis* when it comes to TNG films. And, of course, *Wrath of Khan* for TOS.

NICOLE: *Star Trek IV: The Voyage Home*. Humpback whales? Time travel? San Francisco? Only in Star Trek.

HP Radio Show

CHAPTER 4
THE JOANNE AND KEN SHOW

If done as a video then every one of Ken's lines, which are all palindromes, should be faded up large onto the screen.

FX: JINGLE/CURTAIN CALL
START LOUD
FADE UNDER FOR THIS FIRST NARRATOR BIT
THEN FADE IT UP AND OUT

NARRATOR: Good Afternoon. And welcome back to the Joanne and Ken Show, the radio show which puts you, the listener, right inside this true-to-life docu-drama relationship between two youngsters attempting to be newly weds, pitted against law, fate and nature. Let's join them now as soon cracks over the little green house on Haight Street.

KEN: (SLEEPILY) May a moody baby doom a yam!

NARRATOR: Ken, the young, late rising groom, has been doomed by nature to a totally palindromic life. His every sentence does, and must, make sense both backwards and forwards. And his death will necessarily come about upon his re-entering the female womb.

JOANNE: Good morning, Ken.

NARRATOR: Joanne, the beautiful young bride has been up for a day and a half working on a thesis for her Master's Degree on *The Reversible Names of Japanese Cars*. She has eaten only saltine crackers since waking.

KEN: Doc, note. I dissent. A fast never prevents a fatness. I diet on cod.

JO: I know you do Ken, and I think that's wonderful. But I just can't eat fish indoors. That's why I eat so many of those kumquats.

KEN: No lemons? No melon?

JO: No. Just kumquats. I should eat other fruit, you're right. But not right now, my sweet. But you were also insistent about something to do with sweet things. I just can't recall...

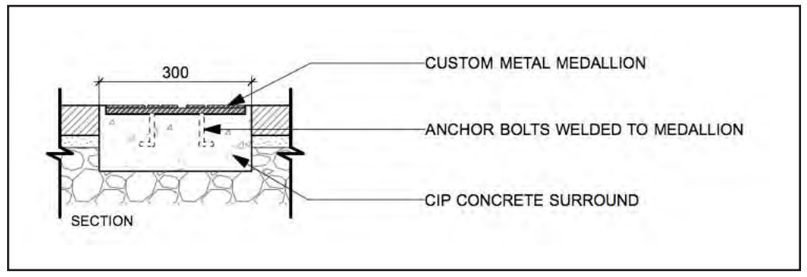
Southeast False Creek Sidewalk Medallions

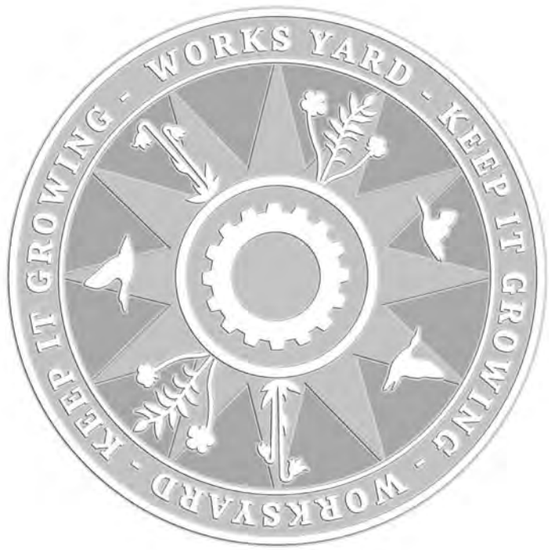
City of Vancouver

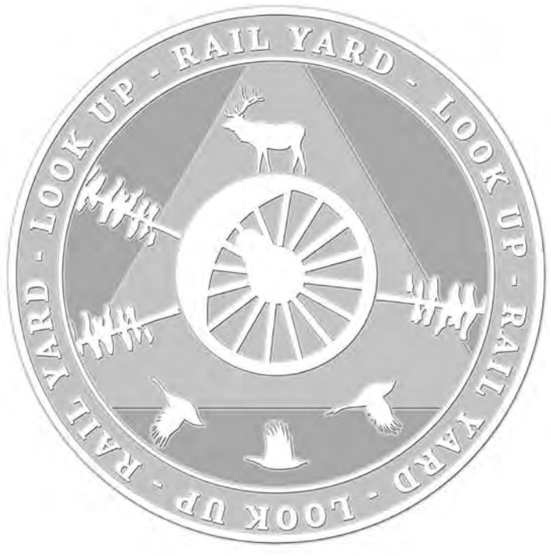
Vancouver BC
Fall 2008

Green sand cast iron
Inset 11" diameter medallions into concrete tile 12"
Vancouver BC
Fall 2008

The proposed sidewalk medallions explore and envision the relationship between the ecological heritage (prolific estuary, hunting and trade route for Coast Salish People) and the industrial heritage of SEFC, and the reintegration of the indigenous flora and fauna back into the landscape. A visual synthesis of ideas, the medallions offer a semiliteral, iconic chronology of the past uses of the SEFC site.







BC Hydro Vista LIds
Exploring the Spatial History of SEFC

City of Vancouver

Fall 2008

CNC aluminium
6x w=3m, l=2.7m

These large 'canvases' on the ground will portray a continual narrative across the public realm of the SEFC private lands that pulls pedestrians through the site, opening their eyes to the very rich and complex histories (spatial, cultural, ecological, etc.) of the area. Each lid has a general theme that can be tied to aspects of sustainability, and connects three voices from different eras, specific to SEFC, Mount Pleasant and early Vancouver. Each lid contains four content layers: 1. base map, 2. text, 3. objects and 4. animal tracks.

The Challenge Series

Roger Bayley Inc.

On-line book and Print publication
Vancouver BC
2009

The Challenge Series is a seven chapter publication which tells the story of the planning, design and construction of Vancouver's Olympic Village. My role within this project was that of visual content strategist, working closely between the principal, the writers and the graphic designers to ensure cohesion between the written word and the images.

Description | Full Record | Author Notes | Excerpts | Reviews

One of Time magazine's 100 all-time best English-language novels. Only once in a great while does a writer come along who defies comparison--a writer so original he redefines the way we look at the world. Neal Stephenson is such a writer and Snow Crash is such a novel, weaving virtual reality, Sumerian

People love this book. People I respect love this book. I did NOT love this book. Snow Crash fills me with rage. I love sci-fi, and Snow Crash seems entirely composted of cliches, and stereotypes. The most imaginative things have been done better in other novels - he's like the GirlTalk of science fiction. Stephenson lacks subtlety and the narration felt extremely condescending. I had to put the book down when I was half way through, and I rarely give up on novels.

Oliver Kelhammer

Oliver Kellhammer is a Canadian land artist, permaculture teacher, activist and writer. His botanical interventions and public art projects demonstrate nature's surprising ability to recover from damage. His work facilitates the processes of environmental regeneration by engaging the botanical and socio-political underpinnings of the landscape, taking such forms as small-scale urban eco-forestry, inner city community agriculture and the restoration of eroded railway ravines. His process is essentially anti-monumental - as his interventions integrate into the ecological and cultural communities that form around them, his role as artist becomes increasingly obscured. He describes what he does as a kind of catalytic model-making, which lives on as a vehicle for community empowerment while demonstrating methods of positive engagement with the global environmental crisis.
